

TAREA 6.1**Activity 1**

Describe step by step how to make a multimedia video presentation.

PLAN YOUR PRESENTATION:

Start by deciding what message you want to convey and who your audience is. Create an outline of your presentation and decide what content you will include.

CHOOSE YOUR SOFTWARE:

There are many software options for creating multimedia video presentations, including PowerPoint, Keynote, Google Slides, Prezi, and Adobe Spark. Choose the software that best fits your needs and skill level.

GATHER YOUR MATERIALS:

Collect all of the materials you'll need for your presentation, including images, videos, and audio files.

CREATE YOUR SLIDES:

Start by creating your slides and adding your content. Use a consistent design throughout your presentation, including fonts, colors, and images.

ADD MULTIMEDIA ELEMENTS:

Enhance your presentation by adding multimedia elements, such as videos and audio files. Make sure these elements are relevant to your presentation and support your message.

EDIT YOUR PRESENTATION:

Once you have added all of your content, go back and edit your presentation for clarity and conciseness. Make sure your slides flow smoothly and your message is clear.

PRACTICE YOUR PRESENTATION:

Practice your presentation several times to ensure you are comfortable with the flow and timing of your slides.

RECORD YOUR PRESENTATION:

Record your presentation using screen recording software or a video camera.

EDIT YOUR VIDEO:

Once you have recorded your presentation, edit your video to remove any mistakes or unnecessary footage. Add any final touches, such as transitions or captions.

SHARE YOUR VIDEO:

Share your video with your audience by uploading it to a video sharing platform like Youtube.

Note: Please be aware that the YouTube link provided for this task does not work.
